SKILLS

LANGUAGES
• Javascript
• Solidity
• Java
WEB
• HTML5 • CSS3
• Typescript
• Tailwind
• Next.js
• Node.js
• Ether.js
• IPFS
• Chainlink
BLOCKCHAIN
• Ethereum
• Solana
TOOLS AND UTILITIES
• Git/Github

CERTIFICATIONS

• Decentralized Finance (DeFi)
Infrastructure by Duke University

INTERESTS

• Table Tennis
• Economics

OTHER PROJECTS

• Lens profile fetcher
• Typescript Shopping cart
• Mailchimp Newsletter
• Bootstrap website
• Gumroad in web3
• ERC1155 NFT Marketplace
• Inshots in web3

ACHIEVEMENTS

HACKATHONS WON
• Polygon BuidlIt Summer 2022
• Moralis x Filecoin Hackathon
• Chainlink Fall 2022
• FVM Space Warp
• Solana Grizzlython 2023
• Spheron Dappathon
• FVM Dataverse
• Superfluid Wave Pool #9

PROJECTS

SIMULA (Chainlink Fall 22, Filecoin track)
November 2022 | Online
Provides **NFT utility**. Users can stake their Nfts in a contract and claim periodic interests powered by DAO. This DAO votes on proposals to lend these Nfts to others. Users can also deposit their Nfts as collateral and borrow 40% of USDT.

EVENTIFY (Spheron Dappathon, 1st place Biconomy track)
April 2023
A **gasless** event ticketing platform where users can log in with Gmail, host event tickets and shortlist a list of user emails who can claim these tickets. Shortlisted users can then claim these event tickets. They can then sign a gasless transaction to prove ownership of these tickets at any venue.

SPLITWAVE (Solana Grizzlython, #2 Payments track)
March 2023
A Chrome extension to split payments. Users can log in with Gum as well as Solana Pay and make on-chain split transactions among a group. With this users can split bills, and group purchase items.

TEACHO (Superfluid Wave Pool #9, 3rd place)
January 2023
A platform where to stream online lectures. Buyers will have to pay 10 of the amount in advance to create some trust. Both parties can launch a meeting using **Huddle01 SDK**. A stream of money between the attendee and the lecturer will flow using **Superfluid CFA**. The stream stops whenever an attendee ends the meeting.

LINKO (FVM Dataverse, Tellor, Tableland track)
September 2022
Linko is a link redirect utility. Users can generate new links and give that link anywhere and then manage the redirects to it accordingly. They can update, switch redirect versions and stop the redirects. Users can also upload any file to IPFS with encryption using **Lighthouse** set the cid as a redirect.

AGORA (Moralis x Filecoin pool)
September 2022 | Online
A marketplace for digital creators to sell their digital content on the blockchain preserving ownership records. Other users on the platform can buy these files. Users can log in using their web2 socials like Google etc along with web3 wallets.
